**Dow Jones Sustainability Indices**

DJSI recognises Galp as the most sustainable company in the world in its sector

- **The Portuguese energy company leads the sustainability world ranking of the Dow Jones Sustainability Indices for the Oil & Gas Upstream & Integrated sector**
- **With the #1 ranking, Galp has obtained its highest score since featuring in these indices a decade ago, which distinguish the best practices in the environmental, social and governance fields**

Galp is the world's most sustainable company in the Oil & Gas Upstream & Integrated sector in 2021, according to the criteria of the Dow Jones Sustainability Indices (DJSI). The DJSI is one of the leading international benchmark indices for environmental, social and governance practices employed by world-leading companies in sustainability.

This is the first time that the Portuguese energy company has achieved this distinction in its 10 years featuring in the DJSI ranking, thus improving its ranking, from the third place obtained in the 2020 evaluation.

"This recognition highlights Galp's strategy to progressively decarbonise its portfolio and operations. In Galp, we have been focusing both on improving the sustainability of our operations today as well as our investment in new, clean sources of energy, for the future. We believe in transparent reporting of our performance today as well as target setting for the long term. This acknowledgment recognises the progress we have made so far, as well as our path towards regenerating the future together with our customers and society", highlights Andy Brown.

In the DJSI World ranking, Galp came first among the 54 companies evaluated.

According to the 2021 results of the DJSI indices, Galp also leads in the specific categories of "Climate Strategy", "Water Related Risks", "Environmental Reporting", "Social Reporting", "Labour Practice Indicators" and "Environmental Policy & Management Systems".

About the Dow Jones Sustainability Indices

The DJSI Index was created in 1999 by S&P, Dow Jones and SMA, as the first financial performance indicator for world-leading companies in terms of sustainability. The members of this Index are qualified as the companies most capable of creating long-term value to their shareholders, through an effective management of the risks associated with economic, environmental and social factors.

PRESS RELEASE

Lisbon, 16 November 2021

**About Galp**

Galp is an energy company committed to the development of efficient and sustainable solutions in its operations and in the integrated offers to its customers. We create simple, flexible and competitive solutions for the energy or mobility needs of large industries, as well as small and medium-sized businesses and individual consumers. Our offer includes various types of energy – from electricity produced from renewable sources to natural gas and liquid fuels. As a producer, we extract oil and natural gas from reservoirs located miles below sea level, while also being one of the largest Iberian producers of solar-based electricity. We contribute to the economic development of the 10 countries where we operate, and to the social progress of the communities that welcome us. We are, therefore, leaders in our sector in the world's main sustainability indices. Galp has 6360 employees. For more information, visit www.galp.com.
